Preface	xi
Acknowledgements	xiii
1 Origin of clean energy systems	1
<i>Shin'ya Obara</i>	
1.1 Introduction: origin of clean energy systems	1
1.2 Dynamic operational scheduling for a microgrid with renewable energy	2
1.2.1 Introduction	2
1.2.2 Independent microgrid with renewable energy and battery	2
1.2.3 Power balance and objective function	5
1.2.4 Analysis method	6
1.2.5 Case analysis	10
1.2.6 Analysis results	11
1.2.7 Conclusions	20
1.3 Operation analysis of microgrids using an orthogonal array-GA hybrid method	20
1.3.1 Introduction	20
1.3.2 Analysis methods	22
1.3.3 Case study	29
1.3.4 Analysis results	38
1.3.5 Conclusions	45
Nomenclature	46
References	48
2 Key concepts	51
<i>Shin'ya Obara</i>	
2.1 Introduction: key concepts	51
2.2 Dynamic-characteristics analysis of an independent microgrid with an SOFC triple combined cycle	52
2.2.1 Introduction	52
2.2.2 System configuration	53
2.2.3 Modelling of equipment	56
2.2.4 System configuration of SOFC triple combined cycle	62
2.2.5 Analysis conditions	65

2.2.6	Dynamic-characteristics analysis of an SOFC	67
2.2.7	Dynamic characteristics of SOFC triple combined cycle (SOFC-TCC)	68
2.2.8	Conclusions	74
2.3	Performance evaluation of an independent microgrid comprising an integrated coal gasification fuel cell combined cycle, large-scale photovoltaics and a pumped-storage power station	74
2.3.1	Introduction	74
2.3.2	Materials and methods	76
2.3.3	Example of the proposed microgrid analysis	89
2.3.4	Results of analysis and discussions	93
2.3.5	Conclusion	98
	Nomenclature	100
	References	104
3	Control and energy management system in microgrids	109
	<i>Wencong Su</i>	
3.1	Introduction	109
3.2	Protection and control of microgrids	111
3.2.1	Microgrids protection	112
3.2.2	Control approach of microgrid control	112
3.3	Energy management aspects of microgrids	117
3.4	Demand response and demand-side management	118
3.5	Home energy management system	121
3.6	Energy management with SCADA	123
3.7	Supporting infrastructure	125
3.7.1	Smart meters systems	125
3.7.2	Advanced metering infrastructure	126
3.7.3	Privacy and security of smart meters	127
3.8	Conclusion and future research trends	129
	References	129
4	Storage systems for microgrids	135
	<i>Shin'ya Obara</i>	
4.1	Introduction: storage systems for microgrids	135
4.2	Operation planning for a compound microgrid containing a PEFC and photovoltaics with prediction of electricity production using GA and NWI	136
4.2.1	Introduction	136
4.2.2	System configurations	136
4.2.3	Analysis method	139
4.2.4	Case analysis	143
4.2.5	Results and discussion	145
4.2.6	Conclusion	152

4.3	Economic efficiency of a renewable energy-independent microgrid with energy storage using a sodium–sulphur battery or organic chemical hydride	153
4.3.1	Introduction	153
4.3.2	Proposed system	154
4.3.3	System components	155
4.3.4	Control method	164
4.3.5	Analysis example	165
4.3.6	Results and discussion	169
4.3.7	Conclusions	175
	Nomenclature	176
	References	178
5	Reliability and power quality	181
	<i>Jorge Morel</i>	
5.1	Introduction	181
5.1.1	Overview	181
5.1.2	Chapter’s aim and scope	181
5.2	Power quality	182
5.2.1	What is power quality?	182
5.2.2	Why power quality is important?	183
5.2.3	Smart grids and power-quality issues	183
5.2.4	The concept of virtual generator in microgrids	184
5.3	Reliability	187
5.3.1	What is reliability?	187
5.3.2	Interoperability	188
5.3.3	Cybersecurity	189
5.3.4	Flexible operation and self-healing	189
5.3.5	Demand response	190
5.3.6	Smart grids and microgrid standards	190
5.4	Case study	190
5.4.1	Introduction	190
5.4.2	Study system	192
5.4.3	Control strategy	196
5.4.4	Scenario construction	197
5.4.5	Simulation results	198
5.4.6	Conclusion	201
	References	202
6	Clean generation in microgrids	207
	<i>Jorge Morel</i>	
6.1	Introduction	207
6.1.1	Overview	207
6.1.2	Chapter’s aim and scope	207

6.2	Conventional clean generation	208
6.2.1	Wind generation	208
6.2.2	Solar generation	209
6.2.3	Hydro generation	210
6.2.4	Geothermal generation	211
6.2.5	Cogeneration	211
6.3	Unconventional clean generation	212
6.3.1	Bioenergy	212
6.3.2	Ocean energy	213
6.3.3	Waste-to-energy	214
6.3.4	Fuel cell	214
6.4	Case study	215
6.4.1	Introduction	215
6.4.2	System under study	217
6.4.3	Operation strategy	221
6.4.4	Simulation results	223
6.4.5	Conclusion	227
	Nomenclature	228
	References	229
7	Microgrids in Japan	233
	<i>Jorge Morel</i>	
7.1	Introduction	233
7.1.1	Overview	233
7.1.2	Chapter's aim and scope	234
7.1.3	Status before the Fukushima nuclear accident	234
7.1.4	Impact of Fukushima nuclear accident on microgrid development	234
7.1.5	Author's personal experience	235
7.2	Current Japan energy policy	235
7.2.1	The Japanese energy sector	235
7.2.2	The Japanese electricity sector	238
7.2.3	New policy following the Fukushima nuclear accident	238
7.3	Pilot projects in Japan and abroad	241
7.3.1	Earliest microgrid projects	241
7.3.2	Smart community projects	244
7.3.3	International projects	252
	References	254
8	Microgrids in Europe	259
	<i>Sergio Rivera and Tomas Valencia</i>	
8.1	Introduction: the European electrical power system	259
8.1.1	General description	259
8.1.2	The transformation of the European power system	260

8.2	Microgrids research in Europe	261
8.3	Microgrid patents and companies in Europe	263
8.3.1	Microgrids patents in Europe	263
8.3.2	European companies with services on microgrids	264
8.4	Current microgrids projects in Europe	265
8.4.1	Am Steinweg (Germany)	268
8.4.2	Mannheim-Wallstadt (Germany)	268
8.4.3	AEG microgrid in Warstein-Belecke (Germany)	269
8.4.4	Wildpoldsried im Allgäu (Germany)	269
8.4.5	ISET, Kassel (Germany)	270
8.4.6	Feldheim (Germany)	271
8.4.7	Kythnos (Greece)	271
8.4.8	ICCS-NTUA (Greece)	272
8.4.9	CESI Ricerca DER test facility (Italy)	272
8.4.10	University of Genoa – Savona Campus (Italy)	273
8.4.11	EDP swimming pool (Portugal)	274
8.4.12	Factory microgrid (Spain)	274
8.4.13	Atenea (Spain)	275
8.4.14	Labein Experimental Centre (now Tecnalía) (Spain)	275
8.4.15	Centre for Alternative Technology (Wales)	275
8.4.16	UK Microgrid (England)	275
8.4.17	Isle of Eigg (Scotland)	276
8.4.18	Continuon (The Netherlands)	276
8.4.19	Power Matching City (The Netherlands)	276
8.4.20	Energie Kanton Zürich (EKZ) (Switzerland)	277
8.4.21	Nice Grid (France)	277
8.5	Microgrids perspectives in Europe	278
	References	279
9	Microgrids in the United States	283
	<i>Sergio Rivera and Miguel Leon</i>	
9.1	Introduction: USA electrical infrastructure	283
9.2	Microgrid research, technology, standards and policy in the USA	285
9.2.1	Microgrid research in the USA	285
9.2.2	Microgrids technology in the USA	288
9.2.3	Clean energy standards and policy in the USA	291
9.3	Cases of microgrid projects in the USA	293
9.3.1	Microgrid in University of California	298
9.3.2	Fort Carson microgrid	298
9.3.3	Mesa del Sol microgrid	299
9.3.4	Santa Rita Jail microgrid	299
9.3.5	Borrego Springs microgrid	300
9.3.6	Illinois microgrid	300
9.3.7	Hawaii Hydrogen Power Park	302
9.3.8	Kodiak microgrid	302

9.3.9	Microgrid in University of Wisconsin Madison	302
9.3.10	Microgrid in University of Miami	303
9.3.11	Microgrid in University of Texas at Arlington	304
9.3.12	Microgrid in Florida International University	305
9.3.13	Microgrid in University of Texas at Austin	305
9.3.14	Microgrid in Albuquerque	305
9.4	Envisaged data of microgrids in the USA	307
	References	308

10 Microgrids in developing countries 313

Sergio Rivera, Wiston Ñustes, Miguel León and Juan Rodríguez

10.1	Developing countries and their electrical infrastructure	313
10.2	Microgrids research in developing countries	316
10.3	Microgrids technology in developing countries	318
10.3.1	Latin America: Argentina and Brazil cases	319
10.3.2	Asia	320
10.4	Clean energy standards and policy in developing countries	322
10.4.1	Latin America	323
10.4.2	Asia	324
10.4.3	Africa	326
10.5	Current microgrids projects in developing countries	327
10.5.1	Armstrong Microgrid (Argentina)	327
10.5.2	District Power Plant Microgrid (Brazil)	327
10.5.3	Lençois Island Microgrid (Brazil)	327
10.5.4	Microgrid in sustainable building of the Federal University of Juiz de Fora (Brazil)	327
10.5.5	Huatacondo Microgrid (Chile)	334
10.5.6	UPB Microgrid (Colombia)	334
10.5.7	Santa Cruz del Islote Microgrid (Colombia)	336
10.5.8	Photovoltaic project in Baltra Island and Puerto Ayora (Ecuador)	337
10.5.9	Hybrid Project Isabela (Ecuador)	337
10.5.10	Microgrid in Hangzhou Dianzi Technology University (China)	338
10.5.11	Microgrid in Langfang Eco-Smart City (China)	338
10.5.12	Microgrid in Chengde (China)	338
10.5.13	Mae-Sariang (Chiang Mai) Microgrid (Thailand)	339
10.5.14	Mae Hong Son microgrid (Thailand)	340
10.5.15	Community microgrids in India (Dharnai, Sundarbans Islands, Sagar Island)	340
