About the authors	xv
1 Introduction	1
<i>Radovan Kopecek and Joris Libal</i>	
1.1 PV 2017 – history, present and future	1
1.1.1 PV becomes the most cost-effective electricity source	1
1.1.2 What PV technology will win at the end?	4
1.2 Bifacial PV 2018 – history, present and future	5
1.2.1 Short bifacial history	5
1.2.2 Bifacial status	7
1.2.3 Bifacial future	8
1.2.4 Changing to cost per kWh thinking instead of cost per Wp mentality	9
1.3 Bifacial book 2018	11
1.3.1 Latest bifacial publications and presentations	11
1.3.2 Chapters of our bifacial book	12
References	15
2 Bifacial cells	17
<i>Ingrid Romijn, Gaby Janssen, Thorsten Dullweber, Bas van Aken, Naftali Eisenberg, Lev Kreinin, Matthieu Despeisse, Valentin Mihailetschi, Jan Lossen, Wolfgang Jooss and Radovan Kopecek</i>	
2.1 Introduction	17
2.2 History of bifacial cells (from 1960 to 2016)	19
2.3 Characteristics of bifacial cells	22
2.3.1 Bifaciality factor	22
2.3.2 Parameters influencing the bifaciality factor φ	23
2.3.3 Design of bifacial cells	27
2.4 Characterization of bifacial cells	28
2.4.1 Measuring bifacial cells	28
2.4.2 IV measurements under bifacial irradiation	31
2.5 Different types of bifacial solar cells	32
2.5.1 Heterojunction solar cells	32
2.5.2 n-PERT solar cells	35
2.5.3 p-PERT solar cells	40

2.5.4	p-PERC+ solar cells	46
2.5.5	Bifacial back contact solar cells	54
2.6	Industrial solar cell technology roadmap	58
2.6.1	Industry status in 2017	58
2.6.2	Solar cell technology predictions (ITRPV)	59

3.1	Bifacial PV modules: design and characterisation	71
3.1.1	Design considerations for bifacial modules	71
3.1.2	Cell-to-module loss analysis in bifacial PV modules	73
3.2	Optical module design options with bifacial cells and light management	76
3.2.1	Optical module design options with bifacial cells	76
3.2.2	Light management in bifacial modules	77
3.3	Electrical design and interconnect options with bifacial cells: half-cut cells, multi-busbar and multi-wire concepts	79
3.3.1	Multi-busbar interconnection	80
3.3.2	Half cells and smaller	82
3.3.3	Shingles and other stacking options	85
3.3.4	Interconnection of back-contact solar cells	90
3.4	Characterisation of bifacial devices	93
3.4.1	Bifacial I - V characterisation	94
3.4.2	Imaging methods	100
3.4.3	Outdoor measurements on single modules	102
3.5	Modelling of bifacial modules	104
3.5.1	Electrical models	104
3.5.2	Thermal behaviour	105
3.5.3	Optical modelling	107
3.6	Reliability and durability of bifacial modules	107
3.6.1	Effect of higher output current	108
3.6.2	Heat management	110
3.6.3	Selection of module materials for bifacial modules	111
3.6.4	Discussion on current IEC 61215 testing and its suitability for bifacial modules	112
3.6.5	General discussion on safety aspects	113
