1 DC microgrid control principles – hierarchical control diagram	1
<i>Linglin Chen, Tao Yang, Fei Gao, Serhiy Bozhko, and Patrick Wheeler</i>	
1.1 Introduction	1
1.2 The hierarchical control for DC MGs	2
1.3 Primary control	3
1.3.1 Basics of droop control	3
1.3.2 Power sharing errors	6
1.3.3 Droop strategies	8
1.3.4 Dynamic power sharing	10
1.3.5 Interfaces to upper levels	12
1.4 Secondary control	13
1.4.1 Centralized approach	13
1.4.2 Distributed approach	15
1.5 Tertiary control	18
1.6 Summary	20
References	21
2 Distributed and decentralized control of dc microgrids	23
<i>Saeed Peyghami, Hossein Mokhtari, and Frede Blaabjerg</i>	
2.1 Introduction	23
2.2 Decentralized approaches	24
2.2.1 Mode-adaptive (autonomous) droop control	24
2.2.2 Nonlinear droop control	28
2.2.3 Frequency droop control	31
2.3 Distributed approaches	34
2.3.1 Fully communicated control	34
2.3.2 Sparse communicated (consensus-based) control	35
2.3.3 Sparse communicated control using current information	36
2.4 Conclusion and future study	40
