Preface	xi
Acknowledgments	xv
1 Introduction	1
1.1 Introduction	1
1.2 Fuzziness	3
1.3 Fuzzy membership functions	4
1.4 Fuzzy sets	5
References	5
2 Fuzzy sets	7
2.1 Introduction	7
2.2 Fuzzy sets and fuzzy membership functions	13
2.2.1 Triangular membership function	13
2.2.2 Trapezoid membership function	17
2.2.3 Gaussian membership function	22
2.2.4 Bell membership function	23
2.2.5 Cauchy membership function	24
2.2.6 Sinusoid membership function	26
2.2.7 Sigmoid membership function	32
2.3 Properties of fuzzy membership functions	36
2.4 Fuzzy set operations	43
2.4.1 Intersection: t-norm	43
2.4.2 Union: t-conorm	46
2.4.3 Complement	48
2.4.4 De Morgan laws	52
2.5 Adjustment of fuzziness	53
2.6 Problems	55
References	60
3 Fuzzy partitioning	63
3.1 Introduction	63
3.2 Theoretical approaches	66
3.3 Fuzzy partition examples in energy systems	67
3.4 Problems	83
References	87

4	Fuzzy relation	89
4.1	Introduction	89
4.2	Fuzzy relation	89
4.3	Operation with fuzzy relations	99
4.3.1	Intersection of two fuzzy relations	99
4.3.2	Union of two fuzzy relations	99
4.3.3	Negation of a fuzzy relation	100
4.3.4	Inverse of a fuzzy relation	102
4.3.5	Composition of fuzzy relations	102
4.3.6	Compositional rule of inference	108
4.3.7	The relational joint	110
4.4	Binary relations	110
4.5	The extension principle	112
4.5.1	The cylindrical extension	113
4.6	Fuzzy mapping	117
4.7	Problems	122
	References	126
5	Fuzzy reasoning and fuzzy decision-making	127
5.1	Introduction	127
5.2	Fuzzy implications	127
5.3	Approximate reasoning	134
5.4	Inference rules of approximate reasoning	136
5.4.1	Entailment rule of inference	137
5.4.2	Conjunction rule of inference	137
5.4.3	Disjunction rule of inference	137
5.4.4	Negation rule of inference	138
5.4.5	Projection rule of inference	138
5.4.6	Generalized modus ponens rule of inference	139
5.4.7	Compositional rule of inference	139
5.5	Fuzzy reasoning	140
5.5.1	Inference engine with single input single rule	142
5.5.2	Inference engine with multiple input single rule	143
5.5.3	Inference engine with multiple input multiple rule	146
5.6	Problems	156
	References	158
6	Fuzzy processor	161
6.1	Introduction	161
6.2	Mamdani fuzzy reasoning	161
6.2.1	Fuzzification	166
6.2.2	Fuzzy rule base	168
6.2.3	Fuzzy conclusion	168
6.2.4	Defuzzification	171
6.3	Takagi–Sugeno fuzzy reasoning	178

6.4	Tsukamoto fuzzy reasoning	185
6.5	Problems	189
	References	196
7	Fuzzy logic controller	199
7.1	Introduction	199
7.2	Physical system behaviors and control	200
7.3	Fuzzy processor for control	210
7.3.1	Fuzzy rules: the modeling of thoughts	211
7.3.2	The input–output interaction	218
7.4	Modeling the FLC in MATLAB	222
7.5	Modeling the FLC in Simulink	231
7.6	Problems	244
	References	248
8	System modeling and control	251
8.1	Introduction	251
8.2	System modeling	252
8.3	Modeling electrical systems	259
8.4	Modeling mechanical systems	271
8.4.1	Mechanical systems with linear motion	272
8.4.2	Mechanical systems with rotational motion	279
8.5	Modeling electromechanical systems	282
8.5.1	Field subsystem	286
8.5.2	Armature subsystem	287
8.5.3	Mechanical subsystem	287
8.5.4	Electromechanic interaction subsystem	288
8.5.5	Modeling DC motors	290
8.5.6	Modeling AC motors	301
8.6	Problems	301
	References	307
9	FLC in power systems	309
9.1	Introduction	309
9.2	Excitation control	312
9.2.1	Excitation system modeling	315
9.2.2	State–space model of excitation systems	321
9.2.3	FLC of excitation systems	323
9.3	LF control	328
9.3.1	Small signal modeling of power systems	329
9.3.2	FLC design for LFC	335
9.4	FLC in power compensation	347
9.4.1	Power factor improvement	348
9.4.2	Bus voltage control	351
9.5	Problems	356
	References	359

10 FLC in wind energy systems	363
10.1 Introduction	363
10.2 Wind turbine	364
10.3 Electrical generator	368
10.3.1 Dynamic modeling of induction generator	370
10.3.2 Self-excited induction generator	375
10.4 FLC examples in WEC systems	380
10.5 Problems	395
References	398
11 FLC in PV solar energy systems	403
11.1 Introduction	403
11.2 PV cell modelings	406
11.2.1 Reference I–V characteristics of a PV panel	410
11.2.2 Effects of changes in solar irradiation and temperature	413
11.2.3 PV panel modeling in Simulink	418
11.2.4 A PV array emulator	426
11.3 MPP search in PV arrays	429
11.3.1 MPP by lookup tables	430
11.3.2 MPP search algorithm based on measurements of S_X and T_X	431
11.3.3 MPP search algorithm based on voltage and current measurements	432
11.3.4 MPP search algorithm based on online repetitive method	434
11.4 MPPT of PV arrays	435
11.4.1 Constant maximum power angle approach	436
11.4.2 Online load matching approach	441
11.5 Problems	453
References	456
12 Energy management and fuzzy decision-making	459
12.1 Introduction	459
12.2 Distributed generation and control	461
12.3 Energy management in a renewable integration system	463
12.3.1 Centralized control of distributed renewable energy systems	463
12.3.2 Distributed control of renewable energy systems	484
12.4 Problems	490
References	492
Index	495
