Preface	ix
1 Introduction to the Smart Grid using PEVs	1
<i>Junwei Lu and Jahangir Hossain</i>	
Abstract	1
1.1 Introduction	1
1.2 The Smart Grid and Microgrid	2
1.3 Impact of PEVs on Distributed Energy Resources in the Smart Grid	4
1.4 V2G Technology and PEVs Charging Infrastructures	6
References	9
2 Impact of EV and V2G on the Smart Grid and Renewable Energy Systems	11
<i>Taha Selim Ustun</i>	
Abstract	11
2.1 Introduction	11
2.2 Types of Electric Vehicles	12
2.3 Motor Vehicle Ownership and EV Migration	17
2.4 Impact of Estimated EVs on Electrical Network	25
2.5 Impact on Drivers and the Smart Grid	30
2.6 Standardization and Plug-and-Play	32
2.6.1 IEC 61850 Communication Standard and IEC 61850-7-420 Extension	33
2.6.2 Extending IEC 61850 for Electric Vehicle Modeling	34
2.7 Conclusion	38
References	39
3 Distributed Energy Resource with PEV Battery Energy Storage in the Smart Grid	43
<i>Jianguo Zhu, Md Rabiul Islam, Jiefeng Hu, Sonki Prasetya, Yuedong Zhan, Mohammad Jafari, Hung Dung Pham and Youguang Guo</i>	
Abstract	43
3.1 Introduction	43
3.2 Distributed Energy Sources	44
3.2.1 Solar	45
3.2.2 Wind	48

3.2.3	Fuel Cells	50
3.2.4	Electric Vehicles	52
3.2.5	Backup Power Supplies	54
3.2.6	MPPT Strategies for PV Based Microgrids	56
3.3	The Smart Grid and Microgrids	58
3.3.1	Microgrid Topologies	60
3.3.2	Microgrid Control Strategies	63
3.3.3	Simulation Results and Discussion	67
3.3.4	Experimental Results and Discussion	69
3.4	Conclusions	74
	References	74
4	Power Conversion Technology in the Smart Grid and EV	81
	<i>M.A. Mahmud</i>	
	Abstract	81
4.1	Introduction	81
4.2	Dynamical Modelling of EVs	84
4.2.1	Dynamical Modelling of EV Connected to Single-Phase Smart Grid Node	85
4.2.2	Dynamical Modelling of EV Connected to Three-Phase Smart Grid Node	87
4.3	Power Conversion Problem Formulation in Smart Grids with EVs	88
4.4	Feedback Linearisation and Feedback Linearisability of Smart Grids with EVs	89
4.4.1	Overview of Feedback Linearisation	90
4.4.2	Feedback Linearisability of Smart Grids with EVs	91
4.4.3	Partial Feedback Linearisation of Smart Grids with EVs	91
4.5	Distributed Controller Design for Smart Grids with EVs	92
4.6	Performance Evaluation	94
4.6.1	Controller Performance Evaluation During the Charging Mode of EVs	97
4.6.2	Controller Performance Evaluation During the Charging Mode of EVs	97
4.7	Conclusions	100
	Appendix I: Definition of Lie Derivative and Relative Degree	101
	Appendix II: Stability of Internal Dynamics of Smart Grids with EVs	101
	Appendix III: System Parameters	102
	References	103
5	Power Control and Monitoring of the Smart Grid with EVs	107
	<i>M.S. Rahman, F.H.M. Rafi, M.J. Hossain and J. Lu</i>	
	Abstract	107
5.1	Introduction	107
5.2	Impacts of EV Penetration on Grid Power Profile and Requirements of Its Control and Monitoring	108

5.2.1	Voltage and Frequency Regulation	109
5.2.2	Supporting and Balancing of Intermittent RES Powered Smart Grid	110
5.2.3	Controlling and Monitoring via ' <i>Smart Charging/Discharging</i> '	110
5.3	Hybrid EV Powertrain Architectures	111
5.4	Industrially Used Control, Monitoring and Management Strategies	117
5.4.1	EV Induction Motor (IM) Control	117
5.4.2	Requirement of EV Battery Management and Monitoring	119
5.4.3	Techniques for EV Battery Management	120
5.4.4	Techniques for EV Battery Capacity Monitoring	124
5.5	V2G Communication System	129
5.6	System Model	132
5.6.1	Wind Turbine Modelling	132
5.6.2	PV System Modelling	134
5.6.3	EV Energy Storage System (EV-ESS) Modelling	137
5.7	Problem Formulation and Control Strategy	143
5.8	Simulation Results	145
5.8.1	Severe Three-Phase Fault	146
5.8.2	Intentional Islanding	147
5.9	Conclusions	150
	References	151
6	PEV Charging Technologies and V2G on Distributed Systems and Utility Interfaces	157
	<i>Domagoj Leskarac, Chirag Panchal, Sascha Stegen and Junwei Lu</i>	
	Abstract	157
6.1	Introduction	157
6.1.1	Overview	157
6.1.2	Vehicle-to-Grid Concept and PEV Communication Requirements	163
6.1.3	Distributed Generation and the Smart Grid	165
6.1.4	Charging Diversity and Utility Interfaces	167
6.1.5	Local, Central and Distributed Generation	168
6.2	Current PEV Charging Standards	170
6.2.1	Socket Types	171
6.3	Contact-Based PEV Charging	172
6.3.1	Rectifier Topologies for G2V	173
6.3.2	Inverter Topologies for V2G	173
6.3.3	DC/DC Converters	176
6.3.4	Full-Bridge Converters with STATCOM Capabilities	176
6.3.5	Internal STATCOM	178
6.3.6	PEV On-board Charging Designs	178
6.4	Smart Transformer for Charging Station in a Microgrid	180

6.5	Contact Charging Safety Considerations	181
6.5.1	AC Charging	181
6.5.2	DC Charging	182
6.6	Wireless Charging Systems for PEV	183
6.6.1	Wireless Power Characteristics	183
6.6.2	Methods of Wireless Power Transfer	185
6.6.3	Standards of Wireless Charging Systems for PEVs	197
6.6.4	Application of Wireless Charging Systems for PEVs	201
6.6.5	Wireless Safety Considerations	208
6.7	Conclusion	209
	References	209
7	Economic, Social and Environmental Dimensions of PHEV in the Smart Grid	223
	<i>Christopher J. Bennett, Markos Katsanevakis and Rodney A. Stewart</i>	
	Abstract	223
7.1	Introduction	224
7.2	Economic Dimension	225
7.2.1	Smart Electric Vehicle Charging	226
7.2.2	PHEVs as Distributed Energy Resources	229
7.3	Social Dimension	233
7.3.1	Convenience	233
7.3.2	Uncertainty, Trust and Equity	234
7.3.3	Perception of Poor Safety	235
7.3.4	Public Perceptions and Overcoming Resistance to Change	235
7.4	Environmental Dimension	236
7.4.1	LCA for PHEVs and Consideration of Further Automotive Technologies	236
7.4.2	Environmental Impact Comparative Assessment	237
7.4.3	Global Metal Reserves, Production and Pricing Data Related to Vehicle Batteries and Electric Motors	239
7.5	General Method for Developing PHEV Scheduling Systems	243
7.5.1	Introduction	243
7.5.2	Developing Load Forecast Models	245
7.5.3	Initial Scheduling	248
7.5.4	Online Control System	249
7.6	Conclusion	249
	References	250
	Index	253
