1		erview o Chau	of energy systems for electric and hybrid vehicles	1
	1.1	What	are EVs and HVs?	1
	1.2	Benef	its	5
	1.3	Challe	enges	9
			Pure electric vehicles	9
		1.3.2	Hybrid electric vehicles	11
	1.4	Multic	disciplinary technologies	11
	1.5	Energ	y system technologies	13
			Energy source systems	13
			Battery charging and management systems	18
			Vehicle-to-X energy systems	22
			gements	26
	Refe	erences		26
2			of electrochemical energy sources for electric vehicles <i>r</i> H.T. Lee and K.Y. Chan	31
	2.1	Types	of electrochemical cells for electric vehicles	31
		2.1.1	Basic differences among electrochemical cells	32
		2.1.2	Specific energy of electrochemical cells	33
	2.2	Capac		34
		2.2.1	Double layer capacitor	35
		2.2.2	Pseudocapacitor	36
			Hybrid capacitors	37
	2.3	Batter	ies	38
			Lead-acid battery	40
			Nickel-based batteries	41
			Ambient-temperature lithium batteries	43
	2.4		temperature batteries	45
			Sodium-beta batteries	45
		2.4.2	High-temperature lithium batteries	46

	2.5	Metal/air batteries	47
	2.6	Fuel cells	48
		2.6.1 Alkaline fuel cell	49
		2.6.2 Phosphoric acid fuel cell	51
		2.6.3 Proton exchange membrane fuel cell	52
		2.6.4 Molten carbonate fuel cell	54
		2.6.5 Solid oxide fuel cell	55
		2.6.6 Direct methanol fuel cell	56
		Flow batteries	59
	2.8	11	60
		2.8.1 Ultracapacitor characteristics	60
		2.8.2 Ultracapacitors for EV applications	61
		2.8.3 Battery characteristics	61
		2.8.4 Batteries for EV applications	63
		2.8.5 Fuel cell characteristics	63
		2.8.6 Fuel cells for EV applications	64
		Trend	65
	Refe	prences	66
3	Ultr	ahigh-speed flywheel energy storage for electric vehicles	69
		long Li and T.W. Ching	
	3.1	Elumbool operation store as	69
	5.1	Flywheel energy storage 3.1.1 FESSs as the main power source	09 71
		3.1.2 FESSs as auxiliary energy storage	71
	3.2	System configuration	72
	5.2	3.2.1 Flywheel	74
		3.2.2 Bearing	76
		3.2.3 Motor/generator	76
		3.2.4 Power converter	77
		3.2.5 Enclosure	77
	3.3	Electric machines	78
		3.3.1 Induction machine	78
		3.3.2 PMBL machines	79
		3.3.3 Switched reluctance machine	81
		3.3.4 Synchronous reluctance machine	82
		3.3.5 Homopolar machine	82
	3.4	-	87
		3.4.1 Motor/generator control	87
		3.4.2 FESS control	89
		3.4.3 Charge and discharge control	91
	3.5		93
	Ack	nowledgements	93
	Refe	rences	94

4		o <mark>ridizat</mark> i Wong	ion of energy sources for electric and hybrid vehicles	97
	4.1	Introdu		97
	4.2		cteristics of engine and electrical powertrains	98
			Energy efficiency improvement in HEVs	100
			Drivetrain design of BEVs and HEVs	101
	4.3		y sources for EV and HEV applications	102
			Batteries	103
			Fuel cells	109
			Ultracapacitors	112
			Ultrahigh-speed flywheels	112
	4.4	Hybric	lization of energy sources in EVs and HEVs	113
			Hybridization of drivetrains in HEVs	113
	15		Hybridization of energy sources in EVs	123
		Conclu	1510115	126
	Refe	erences		127
5		ar energ g Hang 1	gy harvesting for electric vehicles Lam	129
	5.1		o harvest solar energy?	129
	5.1		Brief history and types of PV technology	130
			Harvesting solar energy for EVs	131
	5.2		Il technologies	132
	0.2		Crystalline silicon	133
		5.2.2	·	135
			Other thin-film PV cells	137
	5.3		cal characteristics and performance of PV cells	138
			Does PV technology matter?	138
			Energy yield calculations	140
			Power management for EVs	141
		5.3.4	Incorporating solar energy into PMS	144
		5.3.5	Harvesting solar energy for charging station	144
	5.4	Case s	tudies	146
		5.4.1	PV module as roof for electrical cart	146
		5.4.2	PV modules mounted on roof of ICEV	149
	5.5	Conclu	usions	151
	Ack	nowledg	gements	151
	Refe	erences		151
6			electromagnetic energy regeneration for electric vehicles and Wenlong Li	155
	6.1	Introdu	uction	155
			Vehicle energy	155
		6.1.2	Vehicle dynamics	157

## viii Energy Systems for Electric and Hybrid Vehicles

	6.2	Electro	omagnetic energy regeneration from braking	159
		6.2.1	Electric machines and power electronic drives	159
		6.2.2	System configuration for braking energy recovery	163
		6.2.3	Modelling of braking energy recovery	165
		6.2.4	Control strategies for regenerative braking	166
	6.3	Electro	omagnetic energy regeneration from suspension system	168
		6.3.1	Suspension systems of vehicles	168
		6.3.2	System configuration of shock absorbers	169
		6.3.3	Energy harvester based on rotational electric machine	170
		6.3.4	Energy harvester based on linear electric machine	171
		6.3.5	Modelling of suspension systems	173
		6.3.6	Control strategies for regenerative suspension	177
	6.4	Summ	ary	181
	Ack	nowledg	gements	182
	Refe	erences		182
7	On-	board t	hermoelectric energy recovery for hybrid electric vehicles	187
	Shuc	angxia I	Niu and Chuang Yu	
	7.1	TEG		187
	7.2	Waste	heat recovery for HEVs	190
	7.3	Therm	oelectric energy system	195
		7.3.1	System configuration with series connection	195
		7.3.2	System configuration with parallel connection	196
	7.4	MPPT		198
		7.4.1	MPPT for thermoelectric energy system with series	
			connection	198
		7.4.2	MPPT for thermoelectric energy system with parallel	
			connection	199
	7.5	PCC		202
	7.6	Experi	imental implementation	205
	Refe	erences		208
8			battery charging strategies for electric vehicles	211
		ciang Sh		
	8.1	Introdu		211
	8.2		ing algorithms for a single battery	213
		8.2.1	Basic terms for charging performance evaluation and	
			characterization	214
		8.2.2	CC charging for NiCd/NiMH batteries	217
		8.2.3	CV charging for lead acid batteries	218
		8.2.4	CC/CV charging for lead acid and Li-ion batteries	220
		8.2.5	MSCC charging for lead acid, NiMH and Li-ion batteries	226
		8.2.6	TSCC/CV charging for Li-ion batteries	230
		8.2.7	CVCC/CV charging for Li-ion batteries	231

		8.2.8	Pulse charging for lead acid, NiCd/NiMH and	
			Li-ion batteries	232
		8.2.9	Charging termination techniques	235
		8.2.10	Comparisons of charging algorithms and new development	236
	8.3	Balanc	ing methods for battery pack charging	238
		8.3.1	Battery sorting	239
		8.3.2	Overcharge for balancing	244
		8.3.3	Passive balancing	244
		8.3.4	Active balancing	246
	8.4	Chargi	ing infrastructure	250
		8.4.1	Battery chargers	250
		8.4.2	Home charging	253
		8.4.3	Public charging	253
	8.5	Conclu	isions	254
	Ackı	nowledg	gements	255
	Refe	rences		255
9	Wir	eless po	ower transfer systems for electric vehicles	261
	Chi-	Kwan L	ee and Wen-Xing Zhong	
	9.1	Introdu	action	261
	9.2	Tesla's	s early work of nonradiative wireless power transfer	263
	9.3		principles for wireless power transfer using near-field	
			ng technique	266
			Basic circuit model	266
			Power flow analysis	268
	9.4	0	etic resonant	269
			Compensation in secondary	270
			Compensation in primary	272
	9.5		nce of the load resistance	276
		9.5.1	Series-compensated secondary	277
		9.5.2	Parallel-compensated secondary	277
	9.6		nission distance	279
	9.7		nission efficiency and energy efficiency of the system	280
	9.8		lucer power gain and maximum power transfer of the system	282
	9.9		ency-splitting phenomenon	283
			ess systems with four coils	284
		Conclu	ision	285
	Refe	rences		286
10			charge technology for electric vehicles	289
	Chur	n T. Rin		
	10.1		duction to the wireless power transfer technologies for EVs	289
	10.2		principles of WPTSs for RPEV	290
		10.2.	1 Configuration of the WPTS	290

	10.2.2 Fundamental principles of the IPTS	292
	10.2.3 Discussions on the requirements of IPTS	293
	10.2.4 Important design issues of the IPTS	294
10.3	Advent of RPEV	296
	10.3.1 Origin of the RPEV: "Transformers for electric	
	railways"	296
	10.3.2 The first development of RPEVs	297
10.4	1	298
	10.4.1 1G OLEV	300
	10.4.2 2G OLEV	300
	10.4.3 3G OLEV	303
	10.4.4 4G OLEV	304
	10.4.5 5G OLEV	307
10.5	Generalized active EMF cancellation methods	307
10.6	Research trends of other RPEVs	311
	10.6.1 The Auckland University Research Team	311
	10.6.2 The Bombardier Research Team	313
	10.6.3 The Endesa Research Team	315
	10.6.4 The INTIS Research Team	315
10.7	Conclusion	316
Refe	rences	316
11 12
