<b>Foreword</b>	<b>xv</b>
<b>Preface</b>	<b>xvii</b>
<b>List of acronyms</b>	<b>xix</b>
<b>Part I Introduction</b>	<b>1</b>
<b>1 History and deployment of ITS (Intelligent Transport Systems) technologies and an outline of the book chapters</b>	<b>3</b>
<i>Adrian Zlocki, Felix Fahrenkrog and Meng Lu</i>	
1.1 Introduction	3
1.2 Classification of ITS	5
1.3 History of ITS	6
1.4 Infrastructure-based ITS	10
1.4.1 Emergency vehicle notification systems, eCall	10
1.4.2 Automatic road law enforcement	10
1.5 Vehicle-based ITS	11
1.5.1 Automation level 1 – advance driver assistant systems (ADAS)	12
1.5.2 Automation level 2 – example: traffic jam assist and platooning	12
1.5.3 Automation level 3 – example: highway pilot	14
1.5.4 Automation levels 4 and 5	14
1.6 Deployment of ITS	15
1.6.1 Standardisation	15
1.6.2 Testing and demonstration	16
1.6.3 Market introduction	17
1.7 Outlook	17
1.8 Outline of the book chapters	18
References	20
<b>Part II Needs and methods</b>	<b>25</b>
<b>2 ITS evaluation policy – Culture and needs</b>	<b>27</b>
<i>Martin Böhm, Barbara Flechl, Walter Aigner and Caroline Visser</i>	
2.1 Introduction	27
2.2 Why evaluation is needed by decision-makers and what it is used for	28

2.2.1	The importance of evaluation for ITS deployment	28
2.2.2	From R&D to ITS deployment	29
2.3	Evaluation policy and how it influences ITS evaluation	32
2.4	Surveying the use of ITS evaluation evidence	35
2.4.1	Background	35
2.4.2	What makes for a decision-making process on ITS investments?	37
2.4.3	Phases in the decision-making process and the use of ITS evaluation evidence	38
2.4.4	How to reach a decision: data needs, data use	39
2.4.5	Sources of ITS evaluation evidence	41
2.4.6	Barriers to evidence-based ITS investment decision-making	42
2.5	Conclusions	43
	References	45
<b>3</b>	<b>Frameworks and methods for ITS evaluation</b>	<b>47</b>
	<i>Evangelos Mitsakis, Josep Maria Salanova Grau, Panagiotis Iordanopoulos and Evangelos Mintsis</i>	
3.1	Description of Intelligent Transport Systems (ITS)	47
3.2	Why is the evaluation of ITS essential?	48
3.3	What to be evaluated?	48
3.3.1	IT-system as such	48
3.3.2	IT-system in use	48
3.4	What is the process of evaluation?	49
3.5	Traditional and commonly used evaluation methods	51
3.5.1	BCA	52
3.5.2	Multi-criteria analysis	52
3.5.3	Design science theory	53
3.6	Evaluation strategies for ITS Projects	54
3.6.1	Goal-based strategy	54
3.6.2	Goal-free strategy	54
3.6.3	Criteria-based strategy	55
3.7	Field Operational Tests (FOTs)	55
3.8	Ex-ante and ex-post evaluation	58
3.9	Socio-economic evaluation	60
3.9.1	Impacts assessment	60
3.9.2	Evaluation of deployment	61
3.10	Conclusions	63
	References	64
<b>4</b>	<b>Evaluation of the impact of ITS</b>	<b>67</b>
	<i>Luca Studer and Giovanna Marchionni</i>	
4.1	Overview of the Diffusion of Intelligent Transport Systems (ITS) in Europe	67
4.1.1	EIP+	71

4.2	The Evaluation of ITS	72
4.2.1	General principles of evaluation	73
4.2.2	The European guidelines	74
4.2.3	Study on KPIs for ITS	77
4.3	US ITS programme overview	81
4.3.1	Mission	81
4.3.2	ITS Strategic Plan	81
4.3.3	The Office of the Assistant Secretary for Research and Technology (OST-R)	83
4.3.4	USDOT ITS knowledge resources	83
4.4	The ITS Toolkit and the Project 2DECIDE	88
4.4.1	ITS Toolkit in action	92
4.5	Comparison and evaluation of the impacts of ITS on roads	94
4.5.1	Objectives	94
4.5.2	Comparison between evaluations	95
	Bibliography	117
<b>5</b>	<b>ITS evaluation – A network perspective</b>	<b>123</b>
	<i>Richard Mudge</i>	
5.1	Traditional approach to ITS evaluation	123
5.2	Brief history of network investments	124
5.3	How does a network create economic value?	127
5.3.1	Key concepts	127
5.3.2	Economic productivity	128
5.3.3	General characteristics of network-scale change	132
5.4	Autonomous vehicles: an ITS network to evaluate	133
5.5	Possible implications	136
5.6	Unanswered questions	137
	References	138
<b>6</b>	<b>Field Operational Tests (FOTs) – The ultimate answer to impact evaluation?</b>	<b>141</b>
	<i>Stig E.R. Franzén and I.C. MariAnne Karlsson</i>	
6.1	Introduction	141
6.2	FESTA	141
6.2.1	The FESTA V	142
6.2.2	The FESTA Handbook	144
6.3	FOTs	144
6.3.1	euroFOT	144
6.3.2	TeleFOT	147
6.3.3	DRIVE C2X	151
6.4	Driving automation FOTs	153
6.4.1	The FESTA approach	155
6.4.2	Transportation system usage	156
6.4.3	Study designs	156

6.4.4	FESTA for driving automation	157
6.5	Concluding remarks	157
	References	159
<b>7</b>	<b>Assessing transport measures using cost–benefit and multi-criteria analysis</b>	<b>161</b>
	<i>Henk Taale, Jan Kiel and Arnoud Muizer</i>	
7.1	Introduction	161
7.2	Scope and aspects	162
7.2.1	Scope	162
7.2.2	Basic principles	163
7.2.3	Relation with existing methods	164
7.3	The assessment method in nine steps	165
7.3.1	Introduction	165
7.3.2	The nine steps	165
7.4	Case studies	173
7.4.1	The nine steps for ‘Zoetermeer on the move’	173
7.4.2	The nine steps for ‘A15 River land’	179
7.4.3	Conclusions from all cases	186
7.5	Conclusions	186
	Acknowledgement	187
	References	187

	<i>Jacques Ehrlich and Nicolas Hautière</i>	
8.1	Introduction	189
8.2	Metrology reminder	190
8.2.1	Range, accuracy and precision	190
8.2.2	Rates: accuracy in binary classification	190
8.2.3	Sampling size and sampling method	191
8.2.4	Sensitivity and operational limits	192
8.3	Complex system validation	192
8.3.1	System granularity	193
8.3.2	Technical validation of sensing modules	193
8.3.3	Technical validation of DF module	193
8.3.4	Latency time	195
8.4	Test facilities	196
8.4.1	Real or virtual approaches	196
8.4.2	Hardware in the loop (HIL)	197
8.4.3	Test and validation tools	198
8.5	A generic template for technical validation	200
8.5.1	Section 1: indicators, tools and procedures	200
8.5.2	Section 2: results	200

8.5.3	Section 3: rates for classifier	201
8.5.4	Section 4: system restrictions	201
8.5.5	Section 5: feedback (or link) to specifications	201
8.6	A case study: ISA++	201
8.6.1	System analysis	201
8.6.2	Example: test and validation of the FOG sensing module	205
8.7	Conclusion	212
